ABOUT BISLEY WORKWEAR

Bisley Workwear is part of the PIP Global family – a leader in Hand Protection and PPE. For nearly 60 years Bisley Workwear has been shaping the Australian workwear industry with unparalleled quality, exceptional service, and value for money.

Today, we are expanding the Bisley brand across the globe providing workers with the ultimate in comfort, durability, and safety.

Bisley Workwear has long been regarded as one of Australasia's most trustworthy brands, offering a comprehensive range of Workwear, Safetywear and Protective wear for both men and women. We put our customers first every time, servicing even the biggest orders with industry-best daily replenishment order fulfilments, consistent quality performance, and service that exceeds customer expectations. Our strength remains rooted in simple old-fashioned values that drove our founder.

Bisley Workwear, partners with recognised independent global testing laboratories to certify and develop garments.

Using the latest in innovative technologies allows us to maintain the highest quality and compliance of our workwear, safetywear and protective wear.

Bisley Workwear is leading the industry with ESG compliance initiatives.

BISLEY STANDARDS

Bisley Workwear garments are developed and tested to meet stringent industry standards and deliver work, health and safety (WHS) solutions.

PPE REGULATION (EU)

2016/425 The PPE Regulation (EU) 2016/425 provides for harmonised requirements and procedures to establish compliance for products placed on the EU market, to ensure free movement in the EU territory for personal protective equipment Labelling Code Using Symbols.

BISLEY WORKWEAR GARMENTS COMPLY WITH THE CE MARKING IN ACCORDANCE WITH PPE REGULATION (EU) 2016/425.

PPE REGULATION (EU)

The PPE Regulation (EU) 2016/425 as retained in UK law and amended provides for harmonised requirements and procedures to establish compliance for products placed on the UK market, to ensure free movement in the UK for personal protective equipment.

BISLEY WORKWEAR GARMENTS COMPLY WITH UKCA MARKING IN ACCORDANCE WITH PPE REGULATION (EU) 2016/425 AS RETAINED IN UK LAW AND AMENDED.

EN 343:2019

Protective clothing – Protection against rain.

This European standard specifies the requirements and test methods for materials and the construction of protective clothing that has been designed to give protection against rain.

X indicates resistance to water penetration, where class 1 is the lowest and class 4 is the highest.

Y indicates water vapour resistance, where class 1 is the lowest and class 4 is the highest.

R indicates the readymade garment rain tower test. This test is optional for the standard. X is the value given if the product is not tested.

BISLEY WORKWEAR GARMENTS HAVE BEEN DESIGNED TO GIVE PROTECTION AGAINST RAIN.

EN ISO 20471:2013+A1:2016

High visibility clothing – Test methods and requirements.

This international standard specifies the test methods and visual requirements for high visibility safety garments in high risk environments. High visibility garments are categorised into three different classes, in accordance to the high risk areas. All garments should be labelled with the EN ISO 20471 icon, accompanied by the appropriate class number. The number next to the graphical symbol (X) indicates the garment class as indicated in the table below (minimum required areas of visible material in m²).

BISLEY WORKWEAR GARMENTS COMPLY WITH THE VISUAL REQUIREMENTS FOR HIGH VISIBILITY SAFETY CLOTHING.

	Class 1	Class 2	Class 3
Background Material	0.80	0.50	0.14
Retroreflective Material	0.20	0.13	0.10

ISO 3758:2012

Care Labelling Code Using Symbols.

BISLEY WORKWEAR GARMENTS COMPLY WITH ISO STANDARDS FOR CARE LABEL SYMBOLS.

EN ISO 6330:2012

Domestic Washing and Drying Procedures for Textile Testing.

BISLEY WORKWEAR GARMENTS MEET THE REQUIREMENTS OF DOMESTIC WASHING AND DRYING IN ACCORDANCE WITH EN ISO 6330:2012.

ISO 14184-1:2011

Textiles - Determination of Formaldehyde Part 1: Free and Hydrolized Formaldehyde (Water Extraction Method).

BISLEY WORKWEAR GARMENTS ARE FREE FROM FORMALDEHYDE.

BISLEY ICONS

To help you navigate the features of Bisley Workwear, this handy guide will explain the product features and benefits represented by each of our icons. You will find these icons alongside the name of every product in this catalogue.

HIGH VISIBILITY MATERIAL

Bisley Safetywear High Visibility garments are developed to be seen in high-risk environments and protect you from work place hazards.

EN 20471

HIGH VISIBILITY CLOTHING

The number next to the graphical symbol (X) indicates the garment class. Class 1, Class 2, and/or Class 3 rankings given to each garment. End user will need to perform risk assessment dependent on their area of work to determine which garment class is most appropriate.

EN ISO 20471

COLD WEATHER

Garments designed to keep you warm in cold weather.

WINDPROOF

Thanks to special upper fabrics, like e.g. PU-Coating or proccessing, the article is windproof.

STATIC CONTROL

Certain natural fibres do not attract static electricity (static neutral) and therefore reduce the risk of an electric shock to the body. 100% Cotton is the most common static control in garments.

EN 1149-5

WATERPROOF

Waterproof membranes are often added to the reverse side of rainwear fabrics to ensure that no water can penetrate from outside, waterproof garments are fully seam sealed on the inside keeping you dry in wet weather.

EN 343

SHOWERPROOF

Resistant to light rain. Fabric is either treated with an outer coat finish or a waterproof membrane is added to the reverse side of rainwear fabrics. Generally if a garment repels liquid on the outside and is not fully seam sealed on the inside, it is also categorised as showerproof.

BREATHABLE

Fabric is breathable or the garment is designed with ventilation.

EN ISO 11092

RECYCLED

Bisley recycle is made from recycled materials. Using recycled materials helps reduce the environmental impact by reducing the amount of plastic waste that ends up in landfills, oceans, and other natural environments.

BIO SCIENCE FRESCHÉ®

Fresche® microbial treatment is a highly effective approach to long term control and protection against the growth of bacteria and fungus which causes stubborn odours and stains. Fresche® is invisible when applied, it will not impact or change the colour or feel of the garment. Fresche® is derived from coconut oil: a safe, sustainable and renewable resource.

MOBILE POCKET

Special mobile pocket inside or outside.

STRETCH

Built in stretch that allows greater ease of movement when working.

INDUSTRIAL

Reinforced stitching, bartacks, rivets and heavy duty fabrics mean Bisley Workwear products with this symbol have been developed for industrial environments or work places.

INVISTA™ CORDURA®

Some Bisley Workwear garments have Cordura® incorporated into them to enhance tear and abrasion resistance, due to the high quality, resilient Nylon yarns are used to create it.

BISLEY OVERVIEW

We have specialized in the development of durable and hard-wearing clothing for over 60 years.

SIZING & HOW TO MEASURE

MEN'S MEASUREMENTS

- 1 **BUST:** Measure around the fullest part of the bust under the arms with your arms at resting position.
- 2 **WAIST:** Measure over undergarments at the natural waistline (usually approx. 1cm above the navel).
- 3 **LOWER WAIST:** Measure over undergarment approx. 4cm below the natural waistline.
- 4 **HIP:** Measure over undergarments at hips (usually the widest part and is approx. 25cm below the waistline).
- 5 **IN-LEG:** Measure from crotch to floor, with shoes.
