ABOUT BISLEY WORKWEAR

Bisley Workwear is part of the PIP Global family – a leader in Hand Protection and PPE. For nearly 60 years Bisley Workwear has been shaping the Australian workwear industry with unparalleled quality, exceptional service, and value for money.

Today, we are expanding the Bisley brand across the globe providing workers with the ultimate in comfort, durability, and safety.

Bisley Workwear has long been regarded as one of Australasia's most trustworthy brands, offering a comprehensive range of Workwear, Safetywear and Protective wear for both men and women. We put our customers first every time, servicing even the biggest orders with industry-best daily replenishment order fulfilments, consistent quality performance, and service that exceeds customer expectations. Our strength remains rooted in simple old-fashioned values that drove our founder.

Bisley Workwear, partners with recognised independent global testing laboratories to certify and develop garments.

Using the latest in innovative technologies allows us to maintain the highest quality and compliance of our workwear, safetywear and protective wear.

Beyond ESG compliance, Bisley Workwear leads the industry with sustainability initiatives, responsibly sourced materials, and ongoing efforts to reduce its environmental footprint.

COLLECTION DESIGNED FOR EUROPE

COLLECTIONS DESIGNED WITH EUROPE IN MIND

Our initial collection for the European market is structured around four core lines:

Two Tone Work & Outdoor Rainwear High Visibility

TECHNICAL DESIGN. TOTAL DURABILITY.

YOUR BEST DEFENSE AGAINST THE WEATHER

STAND OUT SAFELY. WORK WITH CONFIDENCE.

READY FOR WORK. AND EVERYTHING AFTER.

Bisley
WORKWEAR

BISLEY STANDARDS

Bisley Workwear garments are developed and tested to meet stringent industry standards and deliver work, health and safety (WHS) solutions.

PPE REGULATION (EU)

2016/425 The PPE Regulation (EU) 2016/425 provides for harmonised requirements and procedures to establish compliance for products placed on the EU market, to ensure free movement in the EU territory for personal protective equipment Labelling Code Using Symbols.

BISLEY WORKWEAR GARMENTS COMPLY WITH THE CE MARKING IN ACCORDANCE WITH PPE REGULATION (EU) 2016/425.

PPE REGULATION (EU)

The PPE Regulation (EU) 2016/425 as retained in UK law and amended provides for harmonised requirements and procedures to establish compliance for products placed on the UK market, to ensure free movement in the UK for personal protective equipment.

BISLEY WORKWEAR GARMENTS COMPLY WITH UKCA MARKING IN ACCORDANCE WITH PPE REGULATION (EU) 2016/425 AS RETAINED IN UK LAW AND AMENDED.

EN 343:
2003+A1:2007

EN 343:2019

Protective clothing – Protection against rain.

This European standard specifies the requirements and test methods for materials and the construction of protective clothing that has been designed to give protection against rain.

X indicates resistance to water penetration, where class 1 is the lowest and class 4 is the highest.

Y indicates water vapour resistance, where class 1 is the lowest and class 4 is the highest.

R indicates the readymade garment rain tower test. This test is optional for the standard. X is the value given if the product is not tested.

BISLEY WORKWEAR GARMENTS HAVE BEEN DESIGNED TO GIVE PROTECTION AGAINST RAIN.

EN ISO
20471:2013+A1:2016

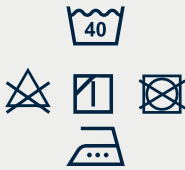

EN ISO 20471:2013+A1:2016

High visibility clothing – Test methods and requirements.

This international standard specifies the test methods and visual requirements for high visibility safety garments in high risk environments. High visibility garments are categorised into three different classes, in accordance to the high risk areas. All garments should be labelled with the EN ISO 20471 icon, accompanied by the appropriate class number. The number next to the graphical symbol (X) indicates the garment class as indicated in the table below (minimum required areas of visible material in m²).

BISLEY WORKWEAR GARMENTS COMPLY WITH THE VISUAL REQUIREMENTS FOR HIGH VISIBILITY SAFETY CLOTHING.

	Class 1	Class 2	Class 3
Background Material	0.80	0.50	0.14
Retroreflective Material	0.20	0.13	0.10

ISO 3758:2012

Care Labelling Code Using Symbols.

BISLEY WORKWEAR GARMENTS COMPLY WITH ISO STANDARDS FOR CARE LABEL SYMBOLS.

EN ISO 6330:2012

Domestic Washing and Drying Procedures for Textile Testing.

BISLEY WORKWEAR GARMENTS MEET THE REQUIREMENTS OF DOMESTIC WASHING AND DRYING IN ACCORDANCE WITH EN ISO 6330:2012.

ISO 14184-1:2011

Textiles - Determination of Formaldehyde Part 1: Free and Hydrolized Formaldehyde (Water Extraction Method).

BISLEY WORKWEAR GARMENTS ARE FREE FROM FORMALDEHYDE.

BISLEY ICONS

To help you navigate the features of Bisley Workwear, this handy guide will explain the product features and benefits represented by each of our icons. You will find these icons alongside the name of every product in this catalogue.

HIGH VISIBILITY MATERIAL
Bisley Safetywear High Visibility garments are developed to be seen in high-risk environments and protect you from work place hazards.
EN ISO 20471

HIGH VISIBILITY CLOTHING
The number next to the graphical symbol (X) indicates the garment class. Class 1, Class 2, and/or Class 3 rankings given to each garment. End user will need to perform risk assessment dependent on their area of work to determine which garment class is most appropriate.
EN ISO 20471

COLD WEATHER
Garments designed to keep you warm in cold weather.

WINDPROOF
Thanks to special upper fabrics, like e.g. PU-Coating or processing, the article is windproof.

SUN PROTECTION
The ultraviolet radiation transmitted through a fabric to the skin is measured and given a rating of 15 (min protection), 30 (good protection), 50, 50+ (excellent protection).
AS/NZS 4399:2020

STATIC CONTROL
Certain natural fibres do not attract static electricity (static neutral) and therefore reduce the risk of an electric shock to the body. 100% Cotton is the most common static control in garments.
EN 1149-5

WATERPROOF
Waterproof membranes are often added to the reverse side of rainwear fabrics to ensure that no water can penetrate from outside, waterproof garments are fully seam sealed on the inside keeping you dry in wet weather.
EN 343

SHOWERPROOF
Resistant to light rain. Fabric is either treated with an outer coat finish or a waterproof membrane is added to the reverse side of rainwear fabrics. Generally if a garment repels liquid on the outside and is not fully seam sealed on the inside, it is also categorised as showerproof.

BREATHABLE
Fabric is breathable or the garment is designed with ventilation.
EN ISO 11092

RECYCLED
Bisley recycle is made from recycled materials. Using recycled materials helps reduce the environmental impact by reducing the amount of plastic waste that ends up in landfills, oceans, and other natural environments.

BIOSCIENCE FRESCHÉ®
Fresche® microbial treatment is a highly effective approach to long term control and protection against the growth of bacteria and fungus which causes stubborn odours and stains. Fresche® is invisible when applied, it will not impact or change the colour or feel of the garment. Fresche® is derived from coconut oil: a safe, sustainable and renewable resource.

MOBILE POCKET
Special mobile pocket inside or outside.

OEKO-TEX® STANDARD 100 CERTIFICATE
Label for textiles tested for harmful substances.

STRETCH
Built in stretch that allows greater ease of movement when working.

INDUSTRIAL
Reinforced stitching, bartacks, rivets and heavy duty fabrics mean Bisley Workwear products with this symbol have been developed for industrial environments or work places.

INVISTA™ CORDURA®
Some Bisley Workwear garments have Cordura® incorporated into them to enhance tear and abrasion resistance, due to the high quality, resilient Nylon yarns are used to create it.

PRINTING ON HI-VIS CLOTHING

IS IT POSSIBLE TO CUSTOMIZE HIGH VISIBILITY WORKWEAR WITH CORPORATE LOGOS?

The growing importance of brand identity has led to increased customization of high-visibility workwear. However, it is essential to consider certain factors to ensure that printed logos or markings on these garments do not compromise their certification or reduce their visibility performance.

ASPECTS TO TAKE INTO ACCOUNT:

1) FLUORESCENT AND REFLECTIVE MATERIAL SURFACE

As indicated in the EN 20471 standard on the previous page, for a garment to comply with the regulations according to class (I, II, or III), it must have a minimum area of fluorescent and reflective material. When we apply markings to

the garment that are not reflective, they could reduce the minimum area and therefore affect the certification.

2) LOCATION OF THE LOGO/DESIGN

It is recommended to avoid areas with reflective material, as well as seams, pockets, or areas where the marking could affect the garment's functionality.

The most recommended areas are shown graphically below.

✓ On the front and back

✓ On the side

✓ Pants front and back

Bisley.POSITIVE

VISION AND MISSION

Bisley has been shaping the Australian workwear industry for over 60 years.

We pride ourselves on being a big company, built on small company values. As we work to formalise our strategy and roadmap for Bisley.POSITIVE, we have outlined the steps that we have taken to date to positively transform our business operations to be more responsible.

As a leading workwear company, we commit to delivering safe, exceptional products and prosperity to our stakeholders, and to being a positive influence on our industry's impact on the planet and its people. At Bisley, we adopt a continuous improvement philosophy.

The development of the Bisley.POSITIVE program is a testament to our longstanding commitment to drive excellence. As our industry faces major geopolitical, human rights, environmental, systemic, and health and safety challenges, we recognise the need to take a proactive approach, and work to drive collective impact as a responsible corporate citizen.

The Environmental, Social and Governance (ESG) team is getting our job done, so you can do yours.

ETHICAL SOURCING AND HUMAN RIGHTS

2025 and into the future

The development of Bisley.POSITIVE is our commitment to continuous improvement to drive excellence within our business.

As a global apparel company, we understand our responsibility to our value-chain partners. We pride ourselves on having longstanding and well-established relationships with our Tier 1 partners; our values and standards are built on these foundations, as well as acknowledged within our signed agreements.

Our efforts were focused on establishing a team to drive our Human Rights and Ethical Sourcing program.

In addition, our ESG team are constantly reviewing our sustainability work and product offering. This assists Bisley to build the foundations of ethical sourcing within the business through aligning with key experts, training, and research and development.

- Formed ESG Supplier Compliance Team responsible for reviewing and assessing all SEDEX's SMETA 4 Pillar Audit and potential non-conformances, ensuring our supply partners are committed to our policies and expectations.
- Increased diligence in auditing and on-boarding across the Bisley value-chain.

BISLEY.POSITIVE IS ALIGNED WITH 4 CORE UNITED NATIONS SUSTAINABLE DEVELOPMENT GOALS

As a responsible brand on a collective impact journey, we have aligned ourselves to the United Nations Sustainable Development Goals. Each strategic step is aligned with a specific goal, and provides us with a unified framework for reporting.

COMMITMENT & EXECUTION

Solidifying our commitment and creating pathways for execution was a key priority this year and into the future. Through key stakeholder partnerships, we elevated our ethical sourcing work, transitioned to lower impact alternatives across areas of our operations and product, and became signatories to key industry programs.

We support the UN Sustainable Development Goals and have aligned our business activities and partnerships to the relevant global goals. Collectively, everyone at Bisley is focused on the Bisley.POSITIVE Goals. Our team actively works towards finding more sustainable solutions and advancements for our value chain.

OUR COMPANY PILLARS

Our team is focused on driving results, actively working with industry stakeholders to find lower impact solutions across our products and operations.

PEOPLE	PLANET	PRODUCT	PROSPERITY
A healthy and resilient business is reliant on the wellbeing of its people. Our work is focused on driving positive impact and fostering a culture of inclusivity for our people, within both our internal and external operations.	The planet is a key stakeholder in our business. As an organisation that relies on natural resources, we take a considered approach to decision making, in the aim of minimising our footprint, and working towards restoring balance within our industry.	Creating functional, safe and responsible workwear is the core of our business and we are committed to displaying stewardship in the area of circularity and product innovation.	Making a meaningful contribution to society and the environment is a key value of our organisation. An important part of our responsible business journey is to support and implement programs that will enable and enhance the positive impact of our industry.

Bisley.POSITIVE

Mission to become leaders, fulfilling our responsibility to positively transform our industry to get the job done, so you can do yours.

WORKWEAR HI-VIS

In the diverse settings of modern workplaces, visibility plays a crucial role in ensuring safety. Our hi-vis work clothes are designed to meet this essential need across various environments. We are committed to delivering high quality safety work clothing.

SIZING & HOW TO MEASURE

MEN'S MEASUREMENTS

- 1 CHEST:** Standing naturally, measure around the fullest part of the chest and shoulder, under the arms with your arms at resting position.
- 2 WAIST:** Measure over undergarments at the natural waistline (usually approx. 1cm above the navel).
- 3 IN-LEG:** Measure from crotch to floor, with shoes.
